

# SACRED HEART SCHOOL

Maharana Pratap Chowk, Jhumri Telaiya, Koderma

Website: <http://www.sacredheartkoderma.org/>

Science

Class – VI

## Activity-1

To identify materials of common use.

Procedure :

- Move around in your home—in drawing room, study room, bed-room, kitchen, bathroom etc.
- Identify the things and fill in the blanks in the table given below.

Place	Name of the thing	Material used for making the thing
1. Study room	.....	.....
2. Drawing room	.....	.....
3. Kitchen	.....	.....
4. Bathroom	.....	.....
5. Any other place	.....	.....

Thus, an object can be made of a single material and at times, an object can also be made of many materials.

Sometimes the same object can be made of different materials. For example, a pen can be made from plastic or metal, your shoes can be made from leather, rubber or canvas, or a tumbler used to drink can be made from plastic, steel or glass. This can be explained more clearly through the following Activity.

## Activity-2

To identify different materials which may be used to make an object.

Procedure : Observe the following objects around you and then complete the table given below.

Things	Materials which can be used to make the object			
	Wood	Plastic	Metal	Cane
Table, Chair	.....	.....	.....	.....
Utensils	.....	.....	.....	.....
Almirah	.....	.....	.....	.....
Wash basin	.....	.....	.....	.....
Flooring	.....	.....	.....	.....
School bag	.....	.....	.....	.....
